

Super new range, super new features

Our Supertub designers have been very busy. They've been talking to customers about how to improve life in the laundry then turning the ideas into wonderful reality. This new range of Supertubs gives you more style, better storage and special features that make laundry jobs easier.

Super style from every angle. Here's what we've done to improve the look of Robinhood Supertubs, and innovations to make laundry tasks easier.

o Superb satin finish

For this range of Supertubs, we've gone away from high gloss. The new powder coated satin finish looks more stylish and is less likely to show fingerprints and other marks.

o Tidier hose apertures
We cleaned up the way the hoses go into a Supertub. There's one oval aperture that fits the water inlet hoses and another for the waste water hose. The aperture is larger than it was so even supersized hoses will go through.

There are apertures on both sides so you can configure your Supertub left or right. There's also a new cover plate that discreetly covers the apertures on the side that isn't in use.

o Our taps are both stylish and practical

Depending on the tub you choose, the tap will be a single-handed gooseneck (great for bucket filling), a single-handed mixer (one finger operation) or hot and cold tap handles with a single spout (suitable for lower water pressure water systems).

o Tub taps are central

In keeping with new laundry design trends, we've centralised the taps and spouts. Perfect symmetry!

o Level tap mount for console options

Supertub models that have a tap mounted on a console have been improved. Taps are now mounted on a flat surface, which makes it easier to fill buckets.

o Hidden washing machine taps

Nobody needs to see washing machine taps, so we've hidden them from view to keep the look of your laundry simple and streamlined.

o Doors are now extra rigid

Our doors are now made from two layers of powder-coated galvanised steel with a layer of polystyrene in between. They're more substantial and a pleasure to use.

The doors have two simple magnetic catches. No more fiddly clips. Easy open, easy close.

o Doors are wider and reversible

And that means improved access to storage space. Bulky, odd-shaped items are easier to get in and out. And the doors are easily reversible for left or right opening.

o Tile lip for built-in good looks and wet area protection

Models without a console, have a lip designed to be either covered with a Supertub splashback, or be tiled over. Not only will your Supertub look like an integrated part of your laundry, but more importantly, water splashes will naturally drain into the bowl. It also makes it simple to clean by just wiping down with a damp cloth.

Supertub

Innovation in the laundry. The new range for 2010.

Robinhood

Choose the Supertub that's right for you

Looking for maximum storage?

These three Supertubs take storage to new dimensions.

The **ST9001W** workstation has three wide drawers for everything from shoe-polishing gear to household cleaners. Other storage-friendly choices include the **ST7001** with two drawers, and the **ST6001**, which comes with one huge drawer and a chrome wire basket (inside) – a real multi-task storage solution.

ST9001W & SB1200

Deluxe laundry workstation featuring three giant storage drawers with compartments and single-handed gooseneck tap.

Optional SB1200 add-on includes splashback with rail and two chrome baskets.

ST7001

Family-sized tub with double drawer storage and single-handed gooseneck tap.

ST6001

Family-sized tub with single drawer storage, chrome wire storage basket (inside) and single-handed mixer tap.

ST3701

Family-sized tub with full-width door, storage cupboard and single-handed mixer tap.

ST3201

Family-sized tub with full-width door, storage cupboard and two-handle mixer tap suitable for low pressure water.

ST3101

Family-sized tub with full-width door, storage cupboard and single-handed mixer tap.

ST7001SLIM

Slim tub for smaller laundries. Double drawer storage and single-handed mixer tap.

ST6001SLIM

Slim tub for smaller laundries. Single drawer storage, chrome wire storage basket (inside) and single-handed mixer tap.

STSLIMTAP

Super-compact tub with full-width door, cupboard storage and single-handed mixer tap.

Stylish splashbacks

A splashback serves several purposes – it protects your laundry paintwork from water damage, it stops splashed water from running down the wall to the floor, and it gives your laundry a touch more style. Our splashbacks fit all family-size, non-console Supertubs.

Available in white powder-coat satin finish, you can choose a standard splashback or the premium splashback with hanging rail and chrome storage basket.

Built in connections reduce plumbing costs

Traditionally plumbers install separate connections for a tub and a washing machine but with a Supertub your washing machine hooks up to the hot and cold water supply from the integrated connections inside. There's no need for the second set of wall outlets saving time, effort and cost on the plumbing.

Your Supertub also takes care of the waste water without hooking a hose over the edge of the tub.

All Supertubs cleverly incorporate a waste water pipe that empties directly to the drain via the P trap. It means you can use the washing machine even when you're soaking something in the tub.

With a Supertub your laundry will need only one set of hot and cold water inlets from the wall

Illustration represents how the hoses are connected. The size and position of the hose apertures is different for new models.
